

SANTA GERTRUDIS

70 BULLS 12 NOON FRIDAY, 28TH AUGUST 2020

OPEN AUCTION ON PROPERTY & **AUCTIONS PLUS** ONLINE

**** STAR RATING PERFORMANCE RECORDING

FIT, HEALTHY & READY FOR WORK

- **12 MTH BOOSTER SHOTS 100% VACCINATED**
- **TESTED NEGATIVE PESTI & POMPES DAM HISTORY**
- **CERTIFIED MORPHOLOGY TESTED IN LABORATORY**
- WARRANTY 'AACV CERTIFICATE' **DELIVERY ARRANGED**

CATERING PROCEEDS DONATED TO

Welcome

Hello and welcome to our 6th Annual Sale and thank you for taking the time to read our catalogue and for considering the Cree Stud for the purchase of your next sire.

It seems nothing can dampen the demand for beef at present. Apart from a small correction earlier in the year I cannot remember the market so strong for so long across all descriptions. Primary production (beef) for the first time in history was not affected by the world chaos of Covid-19, and by all accounts it seems set to continue into the foreseeable future.

Thank you to all the attendees of our first 5 sales, your support drives our enthusiasm to progress our herd (and yours) to new heights.

Our focus here is to breed cattle that provide positive inputs into our herd, and yours, across the range of profit driving traits <u>simultaneously</u>. It is exhaustive work sourcing and breeding the animals that have the ability to do this, whilst maintaining a market acceptable phenotype. This is primarily because selecting for one trait can have a negative effect on another. For example, selecting for growth may negatively effect fertility, while selecting for muscle can have an adverse effect on fats. After the last 20 years of buying bulls and recording their performance we have concluded it is impossible to "luck" onto an animal that has balance across the full spectrum of traits. However there are animals out there that have the ability to do this without compromise, and in our efforts to procure and create them, an interesting array of genetics are produced that individually, can cater for various "in herd" improvements. Whether that be faster growth, more finish, more muscle, more calves or smaller calves, a bull can be found with those requirements, on the way to finding the ones with it all.

This year the catalogue features the EBV's displayed as a bar graph, as well as the numbers, for ease of understanding and as an easier way to compare animals. The breed average is the 50% line and to the right is favorable, and to the left is less favorable. Our end goal is to deliver animals that are breed average or better across the range of their recorded traits. You will notice a number of animals this year that are trending towards achieving this goal. The accuracies of the desired traits should still be considered as the lower the accuracy the more likely the EBV will change when more data is analyzed.

We hope this extra information assists in your selection of the best bull for your business. If you want more information or would like to talk to us about performance recording and EBV's please feel free to call, we are happy to assist in any way we can.

Unfortunately, of late, there has been a tradition of rain events and longer dry spells which is when the individuals' genetic merit is put to the test. Like the rest of the East coast of Australia we have just come through a horrific period of dry and are pleased to say our herd has largely remained intact, with good pregnancy test results and

strong weaner weights. The first drought breaking storms earlier this year were received with mixed emotions. While wonderful rain was being received King was struck and killed by lightening. Fortunately, he had settled most of his cows and was in his 4th year of service, but we believe he had so much more to contribute to our herd and to the wider beef industry. His influence will be long lasting as we have retained 3 sons, have 47 daughters and some semen in the tank. Again, this year he features heavily in the catalogue with 15 bulls displaying his desirable performance and phenotypic attributes.

Our other leading Sire in Ferrero also finished up his duties this year. While still with us in retirement in the house paddock, he will not see another season of cows due to age and arthritis. He is represented by another 15 bulls this year demonstrating his terrific balance of growth, muscle, fertility, and IMF.

The first son's of Retained Sire's Mexico (P), Morocco (P), Monte Carlo (P) and Moritz (P) are presented this year along with A.I sons of Cree Mantuan M230(P), Cree Leroy L192 (P) and Rosevale Jackaroo J566(P). A few by Cree Frankenstein (P), Cree Switzerland (P) and Benelkay Hercules (P) round out the catalogue.

In this year's draft of 70 bulls 90% are breed average or above for fertility, 76% are above breed average for 600-day growth and 96% are above breed average for Exp \$Index. In fact, the <u>average</u> Cree sale bull this year has an **\$Exp Index of \$34** which ranks in the top 10% of the breed, a **Days to Calving EBV of -4.5** which is top 20%, and a **600 Day Growth EBV of +33** which is top 20%. This consistency of performance across the profit driving traits gives us the confidence to recommend our bulls to you. 59% of the catalogue is polled or scurred and 46 bulls are Classified "S".

This year we have joined with Elders and Auctions Plus, and we thank the Monto Cattle and Country team for sticking with us for the 9th consecutive year. Due to the unreliable nature of our internet service and handset problems at recent sales, we will be offering the entire draft this year by open auction, and online bidding will be available via Auctions Plus if you cannot attend.

Jo and I look forward to welcoming you to our 6th annual sale. Pre-sale inspections are most welcome, contact us at any time. Any necessary protocols to comply with Covid-19 restrictions will be in place for the safety of all attendees.

Kind Regards,

Shaun & Jo McGuigan

MENTION CREE BULL SALE FOR A 10% DISCOUNT AT THESE PARTICIPATING VENUES

Agent Rebate

A 2% rebate is offered to outside agents introducing approved buyers in writing 48 hours prior to the sale. *Conditions apply

Please send introductions for approval to Shaun & Jo via e-mail at creesantas@bigpond.com

Supplementary Sheets

Supplementary sheets will be available the week before sale, with actual weights, EMA/Fat scans, scrotal sizes and morphology results.

Health & Vaccine Management

- : 2 x 7 in 1 as calves
- : 3 germ blood (weaning)
- : Botulism (3 year)
- : 2 x 3-day sickness as weaners. Pre-sale booster
- : 2 x Pestiguard pre-sale and tested negative to Pesti Virus
- : 2 x Vibrio pre-sale

Crush side semen test and sample for morphology has been conducted by Dr. Allysa Bischoff BVSc. Morphology analysis done by Tim North, Rocky Repro.

An Australian Cattle Vets (AACV) certificate will be supplied with each purchase by Rocky Repro, Alton Downs.

EMA / Fat Scan

All bulls were scanned by David Reid at 600 days and submitted to BREEDPLAN for recording. All lots will be scanned again prior to sale and actual sale weight/scan/scrotal measurement will be provided on supplementary sheets available the week before the sale. Daily gains will be calculated from the stockbook software.

The pedigrees supplied in the catalogue are to the best of our knowledge and belief correct, but many pedigrees are not verified by DNA, and as Sire DNA is not a requirement of SGBAA, no liability is assumed for error in pedigree information and buyers are advised to enquire prior to sale day about any lots of interest if this is of importance to them.

DNA

Currently waiting on confirmation on Horn/Poll testing. Electronic catalogue will be updated when results arrive. All sale bulls are tested negative PI to BVDV (Pesti virus) and Pompes E7 Free.

Refreshments

Morning/afternoon tea and lunch will be available on sale day. Outback Connections and catering proceeds will be donated to Capricorn Rescue Helicopters.

Inspections/Inquiries

We are always available for you to inspect the sale draft prior to the 28th August 2020 and can be contacted by phone or email for any inquiries.

Delivery

Delivery will be available from 'Kiah' on sale day.

After the sale, free delivery can be arranged to the following destinations: Emerald, Goomeri, Roma,

Clermont, Charters Towers, Rockhampton, and all points in between. All care taken but no responsibility held.

We recommend insurance, representatives will be present at the sale.

After Sale Service

Our service goes beyond sale day. We do everything possible to make sure our bulls are fit and healthy. We are interested in what you are wanting to achieve in your breeding program. Please keep in touch.

Injury to Person or Property

All persons who attend the sale do at their own risk and the vendors assume no liability or responsibility, legal or otherwise, for any accident or injury which may occur. In accordance with OH&S protocol, visitors are asked to observe and adhere to all signage.

Disclaimer

Every care has been taken in compiling this catalogue to ensure accuracy of information supplied, but no responsibility is accepted for any errors which may have occurred.

Shaun & Jo feel very privileged to display brands on the Cree Pub wall.

These brands provide a historical record of the properties where the Cree sires have gone to.

If your brand isn't displayed and you would like to be a part of the history at Cree, please bring your branded board with you to the sale.

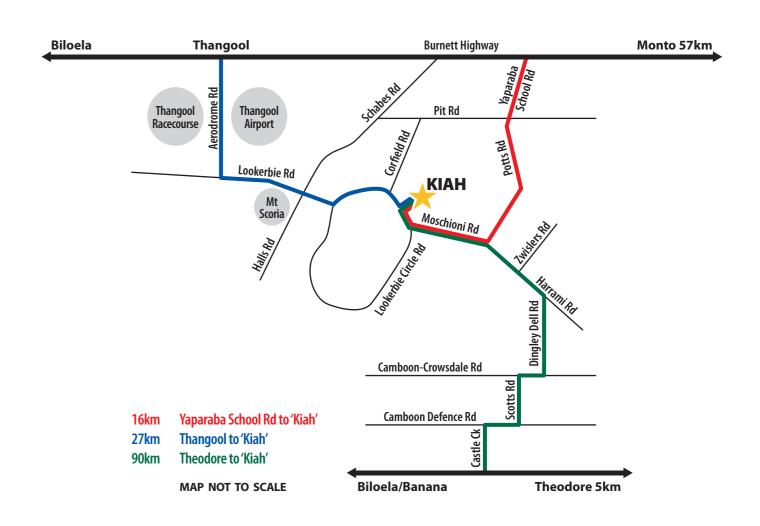

Branding boards will also be available on sale day if you haven't received one.

FERTILITY

Does pregnancy testing increase fertility?

Pregnancy testing is a very good way to drive profitability in a herd but does very little to increase a herd's fertility. The yearly culling of cows that fail to re-breed, only to have them replaced by heifers from the same herd, often daughters from these very same cows, cannot raise fertility.

The foundation cows of the Cree herd have been pregnancy tested since 1967 and we are still prioritizing fertility. Some bulls you buy will have the ability to raise fertility and some will not. The law of averages will prevail. Unless you know the reproductive capability of every bull you purchase, your chances of improving your herds fertility are compromised.

Buying bulls with higher than average Scrotal size and DTC (Days to Calving) EBV's is currently the only way to guarantee you are making fertility your priority. Into the future a percentage normal sperm EBV will be released which will add to these selections.

We have been morphology testing our sires for over 20 years and this year's sale bulls have also been analyzed.

The *average* Cree Sale Bull for 2020 ranks in the top 20% for DTC and in the top 35% for Scrotal Size.

DAYS TO CALVING VERSUS CALVING INTERVAL We are often asked what is the difference?

The calving interval is simply the number of days between a cows calving dates divided by the number of calves she has had. It is a useful indicator of a cows individual performance but is largely affected by management practices. Controlled joining periods, A.I programs, IVF egg donation and single sire bull failures all have a negative effect on the calving interval through no fault of the cow. Any of our yearling heifers that are pre-pubertal or too light for yearling joining are then joined in June/July for an Autumn calving. They are joined to our higher fertility trait bulls to increase their progeny's performance the same way you select a high growth bull to increase weight gain. These calves are then weaned in November when the cows are returned to the bull.

Under this management strategy a cow that conceives on her first cycle after exposure to the bull will still have a calving interval of at least 480 days due to management and the earlier she had the first calf the longer the interval due to no opportunity to re-breed.

The Days to Calving EBV is derived from recording when the cow is exposed to the bull until she has the subsequent calf.

This means it is actually a measurement of her speed of re-breed, how soon she returns to the bull after calving. The EBV takes into account the performance of her sire and dam and all of her siblings and effectively takes out the management issues. This is why a cow with a "relatively" poor calving interval can still have a reasonable EBV for Days to Calving. It also means cows with a good DTC EBV are less likely to produce heifers who will suffer from lactation anoestrus. (won't cycle whilst milking).

This EBV denotes the genetic potential of the animal irrespective of management practices.

Left: 8 Year old Cree J005 (P) dam of retained sire Cree Moritz M198 (P) PTIC on her sixth calf and weaner at foot R224 by Cree Northenly N116 (P)

The BREEDPLAN data supplied in this catalogue was compiled from the 30th June 2020 BREEDPLAN Analysis

Why BREEDPLAN?

BREEDPLAN is the only "quantifiable" way to measure genetic progress. With the necessary obligations of acquiring 200, 400- and 600-day weights along with measuring eye muscle area, rib and rump fat depths, IMF scans, scrotal sizes and recording days to calving EBV'S and flight time, BREEDPLAN allows us to keep our finger on the pulse of our herds performance.

The collection of this data is objective, real performance and cannot be denied "in herd". We believe this to be the most effective way of monitoring our herd's performance and direction. The BREEDPLAN analysis is then the platform to measure our herd in comparison to the Santa Gertrudis breed.

The following is a genetic trends graph that displays the average genetic progress of the Santa Gertrudis breed (50% line) compared to the Cree herd, for the five years up to 2018. From this, we can see we are making "quantifiable" progress in all the areas of improving profitability, which gives us confidence in our

Rib Rump

management and selection processes. The bar graph on each catalogued lot is a quick and easy BREEDPLAN reference tool. The 50% line is breed average and everything to the right is above average and everything to the left is below average. Some care should still be taken to observe the accuracies of the EBV's as the lower the accuracy the more likely some change will occur when more data is analyzed.

Raw Data is simply an animal's ability to handle its current environment and your visual appraisal will reflect this. It is not possible to see an animals carcase quality, nor its ability to produce progeny that can re-breed early. Raw Data does not take into account the difference in an animals age nor the heritability of each trait. EBV's denote the genetic potential irrespective of environment.

As seed stock producers we see this as our obligation and challenge, to measure, record and provide as much information as possible to enable the commercial producer to make the most informed decision when purchasing bulls.

If you operate a self-replacing herd, the bulls you buy this season may well influence the direction of your business for the next 10 to 15 years through the retention of their heifers. This is where the true value of herd recording can be of most benefit.

We'll safeguard your future.

CUSTOM SEMEN COLLECTION - EXPORT & DOMESTIC PROVIDING ALL YOUR BOVINE REPRODUCTION NEEDS

Explanatory Notes

The EBV's contained within this catalogue can be validly compared with other Santa Gertrudis GROUP BREEDPLAN EBV's. These EBV's can not be used to compare animals of another breed.

Estimated Breeding Values (EBV's)

An animal's breeding value is its genetic merit, half of which will be passed on to its progeny. While we will never know the exact breeding value, for performance traits it is possible to make good estimates. These are called Estimated Breeding Values (EBV's).

The EBV is therefore the best estimate of an animal's genetic merit for that trait. EBV's are expressed as the difference between an individual animal's genetics and the genetic base to which the animal is compared.

BIRTH

Gestation Length: The GL EBV (days) is based on Al records. Lower (negative) GL EBV's indicate shorter gestation length and generally easier calving.

Birth Weight: The Birth Weight EBV (kg) is based on the measured birth weight of animals, adjusted for dam age. The lower the value the lighter the calf at birth and the lower the likelihood of a difficult birth occurring. This is particularly important when selecting sires for use over heifers.

FERTILITY

Scrotal Size: The SS EBV (cm) is an indicator of male fertility in regards to semen quality and quantity. Scrotal circumference measurements are taken between 300 and 700 days and adjusted to 400 days of age. Higher (positive) EBV's indicate higher fertility. SS is also positively associated with female fertility.

Day to Calving: The DTC EBV (days) is an indicator of female fertility based on the time between a cows first exposure to a bull and when she subsequently calved. Cows that calve late in the season or fail to calve are penalised. Lower (negative) EBV's are preferred indicating shorter days to calving for the sires daughters.

GROWTH

Milk: 200-Day Milk EBV (kg) is an estimate of an animal's milking ability. For sires, this EBV is indicative of their daughter's milking ability as it affects the 200-day weight of their calves.

200 Day Growth: The 200-Day EBV (kg) is calculated from the weight of animals taken between 80 and 300 days of age. Values are adjusted to 200 days and for dam age. This EBV is the best single estimate of an animal's genetic merit for growth to early ages.

400 Day Weight: The 400-Day Weight EBV (kg) is calculated from the weight of progeny taken between 301 and 500 days of age, adjusted to 400 days and for dam age. This EBV is the best single estimate of an animal's genetic merit for yearling weight.

600 Day Weight: The 600-Day Weight EBV (kg) is calculated from the weight of progeny taken between 501 and 900 days of age, adjusted to 600 days and for dam age. This EBV is the best single estimate of an animal's genetic merit for growth beyond yearling age.

Mature Cow Weight: The Mature Cow Weight EBV (kg) is an estimate of the genetic difference in cow weight at 5 years of age. Lower or more moderate EBV's are generally more favourable.

CARCASE

Carcase Weight: The Carcase Weight EBV (kg) estimates the genetic difference in carcase weight at a standard age of 650 days.

Eye Muscle Area: The EMA EBV (cm2) estimates genetic differences in eye muscle area at the 12/13th rib site of a 300kg dressed carcase. More positive EBV's indicate better muscling.

Rib Fat: The Rib Fat EBV (mm) estimates the genetic differences in fat depth at the 12/13th rib in a 300kg dressed carcase. More positive EBV's indicate more subcutaneous fat and earlier maturity.

Rump Fat: The Rump Fat EBV (mm) estimates the genetic differences in fat depth at the P8 site of a 300kg dressed carcase. More positive EBV's indicate more subcutaneous fat and earlier maturity.

Retail Beef Yield Percent: The RBY% EBV (%) represents total (boned out) meat yield as a percentage of a 300kg dressed carcase. A more positive EBV indicates higher percentage yield for the 300kg carcase size.

Intramuscular Fat Percent: The IMF% EBV (%) is an estimate of the genetic difference in the percentage of intra-muscular fat at the 12/13th rib site in a 300kg carcase. Depending on market targets, larger more positive values are generally more favourable.

ACCURACY

An accuracy value is presented with every EBV and gives an indication of the amount of information that has been used in the calculation of that EBV. The higher the accuracy, the lower the likelihood of change in the animal's EBV as more information is analysed for that animal or its relatives.

Accuracy Range Interpretation

Less than 50% The EBV's are preliminary. EBV's in

this range will have been calculated based on very little information. These EBV's could change substantially as more direct performance information

becomes available on the animal 50 - 74% The EBV's are of medium accuracy.

EBV's in this range will usually have been calculated based on the animal's own performance and some limited

pedigree information.

Explanatory Notes

75 – 90% The EBV's are of medium-high accuracy.

EBV's in this range will usually have been calculated based on the animal's own performance coupled with the performance for a small number of the animal's progeny.

90% and above The EBV's are a high accuracy estimate

of the animal's true breeding value. It is unlikely that EBV's will change considerably with addition of more

progeny data.

Although the accuracy of an EBV should be considered, animals should be compared on EBV's regardless of accuracy. Where two animals have the same EBV however, the animal with the higher accuracy would normally be used more heavily than the bull with the lower accuracy because the results can be predicted with more confidence.

SELECTION INDICES

The Selection Index value for an animal is effectively an EBV of the animal's profitability for a defined commercial production system and market end-point. Ranking bulls on their Selection Index value sorts them based on their progeny's expected differences in profitability for the targeted production system.

As a guide to using Selection Indexes, it is recommended that producers complete the following steps:

- (i) Identify the Selection Index of most relevance to your production system
- (ii) Rank animals on the Selection Index
- (iii) Consider the individual EBV's of importance
- (iv) Consider other traits of importance that may not be accounted for in the selection index (eg. temperament, structural soundness)

There are currently two different selection indexes calculated for Santa Gertrudis association animals. Each Selection Index describes a specific production system and market scenario as described below:

Domestic Production Index

Estimates the genetic differences between animals in net profitability per cow joined for an example self-replacing commercial herd (run in a temperate environment) producing steers for the domestic trade. This Index assumes that the steer progeny are pasture grown and finished and marketed at 500 kg live weight (280 kg HSCW and 12 mm P8 fat depth) at 16 months of age. Daughters are retained for breeding.

Export Production Index

Estimates the genetic differences between animals in net profitability per cow joined for an example commercial herd (run in a sub-tropical environment) producing steers for the export trade. This Index assumes that the steer progeny are pasture grown and finished and are marketed at 620 kg live weight (340 kg HSCW and 15 mm P8 fat

depth) at 28 months of age. Daughters are retained for breeding.

All selection indexes are reported as an EBV, in units of relative earning capacity (\$) for a given production/market scenario. They reflect both the short term profit generated by a sire through the sale of his progeny, and the longer term profit generated by retaining their daughters

Disclaimer

The Santa GROUP BREEDPLAN Estimated Breeding Values contained in this Sale Catalogue were compiled by the Agricultural Business Research Institute (ABRI) from data supplied by the breeder.

Neither Santa Gertrudis Association nor the ABRI oversee or audit the collection of the data.

FEEDMASTER* ATTRITION DISC MILL

Blectric PTO Petrol

FeedMaster DISC MILL

Built in Australia for Australian Farmers

RESULTS SPEAK FOR THEMSELVES!

A recent installation to replace the old roller mill brings immediate results, able to reduce feed rate as well as a lift in production of 1.5lts per cow per day

- Unique processing action releases more protein from each grain.
- Process all size grains including pinched grains.
 Blending multi grains.
- Granulation size to suit all livestock
- Dairy / Beef / Pigs / Sheep / Poultry.
- Simple operation. Manual or fully automated. All at the turn of a dial.
- Smooth quiet operation with low power consumption.
- Extremely low maintenance. Lowest cost consumables of all mills.
- Unique design
- No close moving parts eliminates costly accidents.

ROSEVALE KING K88

Unfortunately, the first storm that broke the dry came with lightening and King was found dead.

King K88 was purchased for the second top Australian price and equal Australian horned bull record of \$70,000 at the 2015 Rosevale sale. His unique mix of Phenotype and Genotype and soundness made him impossible to pass up.

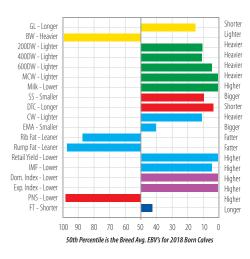

Breed character, coat type, weight for age, perfect sheath and testicles backed up by impressive performance data. He is now a trait leader for 400- and 600-day weight, scrotal size, Days to Calving, Carcase Weight and EMA, which is an impressive balance of the profit driving traits, and ranks him 5th on the list of sires in the breed for Exp \$Index.

To date King has sold 35 sons to average \$10,686. The most notable sales have been \$26,000 for Nogoa N108 (P) selling to David Atkinson Marlborough, Napoleon N002 (P) that sold to Landsborough Stud Winton for \$24,000, Niagara N040 (P) to Gyranda Stud Theodore for \$22,000, King N216 (P) to Surbiton Station Alpha for \$20,000 and Nullabor N010 to Surbiton Station for \$19,000.

King is represented by lots:1, 2, 3, 4, 6, 10, 13, 27, 35, 37, 50, 52, 60, 61 & 62.

CREE **FERRERO F140** (P)

Ferrero F140 (ET) (AI) (P) was retained out of an IVF program. He is by Top Gun 244 (P) (USA). He was used in our heifers and 2 x cows for the first few seasons until his calves began to shine through. This, along with his perfect sheath, early reproductive traits, performance and "oh so quite temperament" saw him elevated to stud duties. Ferrero is currently a trait leader for 600-day growth, scrotal size, days to calving and RBY. His IMF EBV is in the top 5% and he ranks 8th on the list of sires in the breed for Exp \$Index.

His progeny have an easy doing constitution and his sale bulls are often ready early in the preparation.

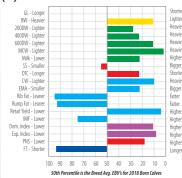

To date 37 sons have sold to average \$9074, topping at \$26,500 for Cree Ferrero M014 (P) selling to Landsborough Santa Gertrudis Stud Winton. Other notable sales were Ferrero M148 for \$18,000 to Surbiton Station and Ferrero N092 to Burleigh Estates for \$18,000. He has sired over 200 calves and the Cree herd has currently 40 PTIC active females.

Ferrero is represented by lots: 7, 8, 12, 23, 24, 25, 26, 32, 40, 45, 53, 54, 55, 63 & 64.

Sire References

BENELKAY HERCULES H030 (P)

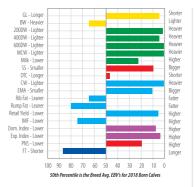

Hercules was purchased for the second top price at the Benelkay Sale in 2014. He is another dark, slick coated poll bull with very small calves, above average growth and high muscling and fertility performance as depicted by his graph. We have found the Hercules line suitable for yearling joining.

Hercules is represented by lots: 11, 33, 37, & 44.

CREE MANTUAN M230 (P)

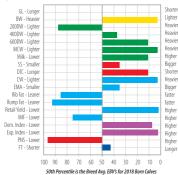

A ¾ share and full possession of Mantuan was sold as Lot 1 in 2018 selling to TVF Fairfax "Albro" for \$15,000.

Dam Cree Jo Jo (IVF) (P) continues to breed strongly with another son in lot 4 this sale and she has just weaned another bull calf by King and is PTIC again.

Mantuan is represented by lots: 20, 39, & 49.

CREE SWITZERLAND H142 (PS)

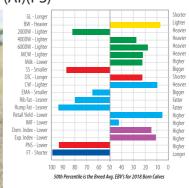

Switzerland H142 (PS) was withheld from the 2013 Rockhampton Sale because of injury. Fortunately, he fully recovered, and being slick coated and poll scurred with growth, fertility and carcase traits we used him.

He is a trait leader for 600-day growth and carcase weight. In 2017 we retained 3 of his sons.

Switzerland is represented by lots: 66, 67, 69 & 70.

CREE FRANKENSTEIN F088 (AI)(PS)

Frankenstein F088 (Al) (PS) was retained for use in the stud being mostly new blood as his Dam was also an Al product by Wave Hill Major (P).

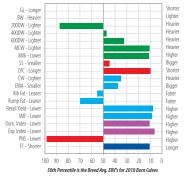

He has a very fine, slick coat type, early sexual maturity and the heavy muscling of the Top Gun 244 (P) (USA) line.

His steer progeny fed at Mort & Co gaining to a top of 3.03kg/day which is consistent with his carcass EBV of +18 for which he is a trait leader.

Frankenstein is represented by lots: 56, 57 & 58.

CREE MOROCCO M126 (P)

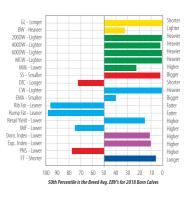

Morocco M126 has an excellent balance of performance which is hard to find, combined with polledness and breed character.

Smaller calves but well above average by 400 and 600-day Growth plus fertility, EMA and IMF traits.

Morocco is represented by lots: 34, 41 & 46.

CREE LEROY L192 (P) (AI SIRE)

Owned by Surbition Station

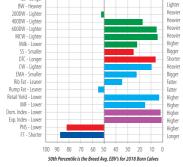

We retained semen ownership in Leroy, when he was purchased by the Dillon Family Surbiton Station Alpha at 2016 Sale for the Cree Stud record of \$40,000.

We used him in an Al program in our yearling heifers and retained a Sire from his first drop in Cree Ponga P006 (PS) (see future sires).

Represented by lots: 5 & 21.

CREE MEXICO M180 (PP)

His graph says it all. This bull epitomizes all we are trying to achieve at stud level.

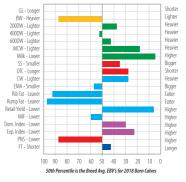

Completeness of performance across all the traits combined with polledness and breed character. Again, smaller calves and rapid growth to 400 and 600 days.

Like his sire Switzerland H142(PS), Mexico is a trait leader for 600-day growth and carcase weight.

Mexico is represented by lots: 15, 16, 30, 35, 43, 51, 59, 65 & 68.

CREE MONTE CARLO M018 (PP)

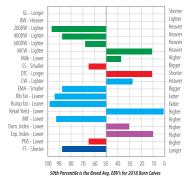

Monte Carlo has a balance of growth, muscle and fertility all above average once again combined with polledness and breed character. He sustained an injury and we lost him in his second season.

Represented by lots: 14, 17, 22, 28, 42 & 47.

CREE MORITZ M198 (P)

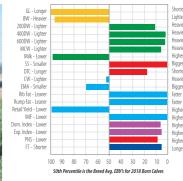

Moritz was used as a backup sire for 2 seasons.

Once again smaller calves and breed average by 600 days, high fertility, and high retail yield.

Represented by lots: 10, 29 & 48.

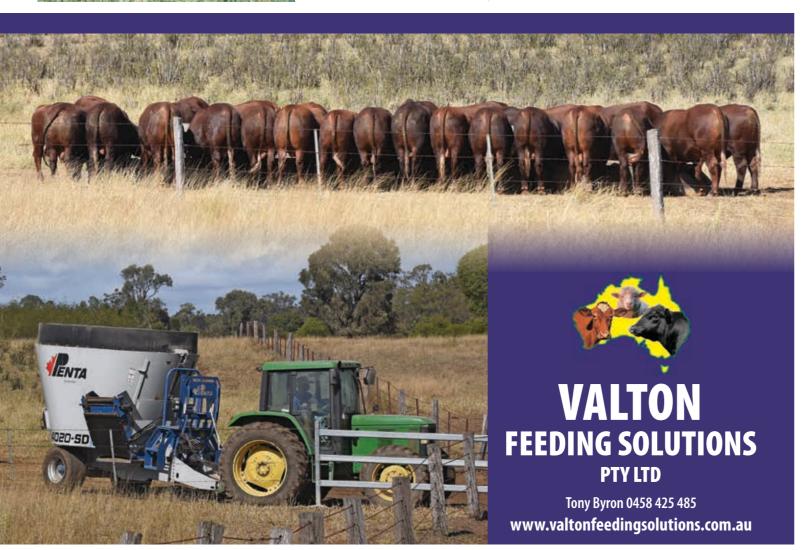

ROSEVALE **JACKAROO J566** (P) (USED AI)

Rosevale Jackaroo is a leading sire in the Rosevale herd and is a trait leader for 400 and 600-day weight and scrotal size. We were attracted to his breed character, high growth, and Fat EBV's which rank him in the top one percent of the breed for finishing ability.

Jackaroo is represented by lots: 19 & 31.

CREE **NORTHERLY N116** (P)

CREE NORMANDY N036 (P)

How to Register and Bid on AuctionsPlus

- Go to www.auctionsplus.com.au to register at least 48 hours before the sale.
- Fill in buyer details and once completed go back to Dashboard.
- Select "**Sign Up**" in the top right hand corner.
- Complete buyer induction module (approx. 30 minutes).
- Fill out your name, mobile number, email address and create a password.
- AuctionsPlus will email you to let you know that your account has been approved.
- Go to your emails and confirm the account.
- Log in on sale day and connect to auction.
- Return to AuctionsPlus and log in.
- Bid using the two-step process unlock the bid button and bid at that price.
- Select "Dashboard" and then select "Request Approval to Buy".
- If you are successful, the selling agent will contact you post sale to organise delivery and payment.

For more information please contact us on:

Mexico Q280 is Dam Cree K063's first bull offered for sale. 1 heifer has been retained in P151 and she is PTIC on her second calf.

Another young bull that should be suitable for heifer joining or perhaps lowering Mat Cow weight while increasing fertility in his daughters. Graph predicts lower growth but high DTC and positive IMF which can be the trade off. Still retains above breed average \$Indexes.

High morphology at 91%.

Dam Notes: Age 1st Calf: 23mth

Calving Int: 370 days No. Calves: 3

Monte Carlo O096 is Dam CreeM079's first bull to be offered for sale. Her first heifer was sold to Bud and Priscilla Quaid at Mossman and her last calf by Normandy died.

An easy doing deep bodied poll bull, again with high growth and fertility. Carcase traits split both ways with good RBY and

Morphology 78%.

Calving Int: 500 days No. Calves: 4

Dam's progeny include Switzerland M182 that sold to TVF Pastoral for \$9500. Her 2nd bull is offered here and her last is a weaner steer by a neighbour's brahman bull. Another early maturing bull with interesting EBV's. They suggest a curve bender from weaning through to top 30% for 600-days then breed average for Mature Cow weight. good DTC and positive for all fats and carcase. Qualifies for optimal morphology at 71%.

Notes

LIVESTOCK AUCTION TERMS AND CONDITIONS OF SALE

- (a) A vendor is bound by these terms and conditions by offering livestock for sale by auction.
 (b) An agent (which includes an auctioneer) is bound by these terms and conditions by conducting an auction sale.
- (c) A buyer is bound by these terms and co ions by bidding at auction.
- (d) Competition and Consumer Act (Cth) 2010
- It is unlawful for parties that are, or otherwise would be, in competition with each other to make, or give effect to, a contract, arrangement or understanding that contains a provision
- price-fixing; or
- restricting outputs in the production and supply chain; or
- iii. allocating customers, suppliers or territories; or
- v. bid-rigging; or
- Large fines and other sanctions may be imposed for unlawful conduct.
- (a) In these terms the expression auctioneer, agent, buyer and vendor respectively includes the servants, contractors and agents of each of them. The auctioneer, agent, buyer and vendor shall be wholly responsible for the acts and omissions of their respective servants. ontractors and agents. The term "auctioneer" includes, so far as the law and context
- permits, the vendor's agent.
 (b) When used in these terms the expressions "companion animals" means all animals originating from the same property on a particular day. Where lots are split and sent to multiple establishments, then all of these animals shall be regarded as companions.
- The following applies in interpreting these terms and conditions:
- (a) The following words have the following meanings: Fees means all levies, charges, fees, costs and other expenses incurred or relating to these terms and conditions and the sale and purchase of livestock including, without limitation transaction levies, yard and weigh dues, cartage, advertising and rebates, and whether paid for, or incurred, by the agent; ivestock means animals auctioned pursuant to these terms and conditions; and
- Price means the amount at which the lot has been sold to the buver referred to in clause 7
- of these terms and conditions
 (i) plus any Fees and other expenses incurred in relation to the purchase of livestock that are pavable by the buver; and
- (ii) plus any GST added in accordance with Clause 12.
- (b) These terms and conditions are subject to legislation or regulation in the State in which the auction is conducted and in the event of any conflict then the legislation or regulation will prevail. The provisions of these terms and conditions are in addition to, and do not derogate from, the duties and rights of vendors, agents and buyers set out in legislation and regulation in the State in which the auction is conducted.

CHAPTER TWO - STANDARD TERMS OF SALE

- Subject to any reserve price, and to the right, prior to the fall of the hammer, of the vendor to withdraw any lot without declaring the reserve, the highest bidder shall be the buyer. The auctioneer has the right to bid on behalf of the vendor provided that right is notified prior
- to the commencement of the sale and is subject to State law
- A bid cannot be made or accepted after the fall of the hammer unless, in accordance with clause 8, the auctioneer decides to put the lot up again.
- Prior to the fall of the hammer the auctioneer shall announce the last bid and receive any further bids. The last price called by the auctioneer at the fall of the hammer shall be the amount at which the lot has been sold.
- In the event of a disputed bid, the auctioneer is the sole arbitrator of the successful bidder or
- the auctioneer may decide to put the lot up again. The auctioneer's decision is final. The auctioneer may refuse to accept any bid which, in the auctioneer's opinion, is not in the best interest of the vendor and need not give reasons for doing so.
- A bidder shall be deemed to be a principal unless, prior to bidding, the bidder has given to the auctioneer a copy of written authority to bid for or on behalf of another person.
- 11. The successful bidder at a livestock auction sale must give to the auctioneer at the fall of the
- (b) the bid card number which identifies the purchaser; or
- (c) the name of the person on whose behalf the successful bid was made; and (d) the Property Identification Code (known as the "PIC") of destination.
- 12. The auction shall be conducted on the basis that the bid price shall be exclusive of Goods and
- GST shall be added after the fall of the hammer for those sales subject to GST.
- The vendor warrants;
- (a) That the vendor has (or will have) the right to sell the livestock at the time of delivery: and (b) That the purchaser will obtain title on completion of the purchaser's obligations under this contract including payment.
- 14 If a buyer does not comply with any of these terms and conditions, which includes the requirements of State law, any livestock knocked down to that buyer may be re-sold by public auction or private contract in whatever lots and manner the auctioneer decides. The re-sale may be with or without notice and shall be at the buyer's risk. The buyer is responsible for all loss and expense arising out of a re-sale and is not entitled to any resulting profit.
- The buyer of livestock must pay the agent the full amount of the purchase price in immediate funds on receipt of a tax invoice. Payment is required prior to delivery unless some other time for navment is specified in an agreement between the buyer and the auctioneer that was made before the fall of the hammer. If, before delivery, payment has not been made then clauses 20 to 23 apply.
- 16. No person may bid unless, prior to the commencement of the sale, that person has made arrangements satisfactory to the auctioneer for payment for livestock purchased. If bids in breach of this condition are inadvertently accepted, delivery shall not be given until the purchase money is paid and any law, rule or practice to the contrary is accordingly negatived
- (a) Cattle sold on a liveweight basis that are weighed pre-sale are at the risk and expense of the buyer upon the fall of the hammer.
- (b) Cattle sold on a liveweight basis that are weighed post-sale are at the risk and expense of the buyer immediately after weighing.

 (c) All livestock other than cattle sold on a liveweight basis are at the risk and expense of the
- buyer upon the fall of the hammer.

 18. (a) Subject to this clause the sale is complete on the fall of the hammer
- (b) The time for rejection is the time commencing at the fall of the hammer and ending at the
- delivery is taken by a representative of the buyer;
- (ii) departure of the animal from the purchaser's delivery pen; or (iii) one hour after the last animal is:
- b. in the case of post-sale weighing, weighed. (c) During the time for rejection the buyer may reject any animal which is lame, blind or diseased where that condition existed prior to the fall of the hammer but could not be
- reasonably observed when the animal was in the selling pen. (d) If the nurchaser rejects an animal during the time for rejection then the sale of that animal is cancelled and the animal is returned to the vendor or sold on such terms as any buyer and the agent may agree, after the agent has disclosed the reason for rejection to that
- (e) This subclause applies only to cattle which are sold in Queensland at auction for slaughter
 The agent has responsibility for the prevention of loss or escape (but not death, sickness or injury) of those cattle from the time of the fall of the hammer, for delivery to and from the scales, to the buyer's delivery pen and onto the buyer's nominated transport. This responsibility ends at the earlier of those cattle boarding the buyer's nominated transport or sunset on the day after the sale. This subclause does not apply if the agent makes an ment to that effect prior to sale.

- implied by law are hereby excluded from the sale to the extent that the law allows. All lots e onen for inspection prior to the commencement of the sale and are sold with all faults fany. No compensation shall be given for any faults, imperfections, errors of description, number in or of any lots sold or otherwise.
- (b) Any claim or objection arising out of an error or misdescription in the provision of relevant information in terms of legislation or regulation concerning the National Livestock Identification Scheme (NLIS) must be made by 5:00pm on the seventh day after the fall of the hammer. No objection, requisition or claim against the vendor or agent in respect of uch error or misdescription can be made after that time.
- (c) Any statements made by the vendor or the auctioneer whether in writing or orally to the effect that any female has been pregnancy tested or scanned positive shall mean and require only that a certificate in writing shall be supplied to the buyer signed by a qualified veterinary surgeon or certified scanner certifying that the said female has been tested or scanned on the date specified in the certificate and that in the opinion of the surgeon or scanner was pregnant on that date.

 (d) For slaughter cattle, the agent undertakes to make every reasonable effort to ensure that
- any NLIS cattle device number is transferred from the salevard PIC to the purchaser's PIC on
- the NLIS database no later than midnight on the day of the sale.

 (e) For other slaughter livestock the agent undertakes to make every reasonable effort to ensure that the NLIS information is transferred from the salevard PIC to the purchaser's PIC on the NLIS database no later than midnight on the day of the sale.

 Where livestock have a food safety or market eligibility status derived from the National
 Vendor Declaration (NVD) and/or the NLIS/ERP database, the agent will inform the buyers
- by presale catalogue and/or announce the status prior to the offering of those lots.

 20. If delivery is made to, or possession obtained by, the buyer or its representative before full payment of the Price, then until full payment is received, the buyer:
- (a) does not acquire title to the livestock:
- (b) holds the livestock as bailee only for the vendor;
 (c) must act in a fiduciary capacity in its relationship with the vendor;
- (d) must store the stock separately or so that they are readily distinguishable from other livestock owned by the buyer;

 (e) is responsible for the safety and well being of the livestock;
- (f) may make a bona fide sale for market value of any or all of the livestock. As between the buyer and the subsequent buyer, the sale shall be made by the buyer in its own name and not as agent for the vendor, however as between the vendor and buyer, the sale shall be made as bailee and agent for the vendor; and
- (g) must keep and account for the proceeds of any subsequent sale separately from its other money and hold those proceeds, together with the benefits of any rights against subsequent buyers, on trust for the vendor.
- (a) Clause 20 creates a registrable security interest under the Personal Property Securities Act (Cth) 2009 (PPSA);
- (b) the Purchaser acknowledges the rights of the Seller (and/or the Agent if Clause 25 applies) to register a financing statement under the PPSA with respect to the security interest created by this clause:
- (c) the Livestock are collateral for the purposes of the PPSA:
- (d) to the extent permitted, the Purchaser waives any right the Purchaser has under the PPSA to receive notices; and
- (e) the date upon which the security interest created by this clause comes into force is the first date on which livestock are delivered pursuant to this contract

 22. The buyer may not make any claim against the vendor for actions by the vendor or its agent
- under clauses 20 or 21 and indemnifies the vendor and its agent against any loss, damage costs, expenses, penalties, fines or claims suffered by the vendor, the agent or any person or entity arising from the vendor exercising its rights under clauses 20 or 21.
- 23.1. Clause 23 applies whenever the agent pays the vendor before being paid by the buyer, which
- the agent is not bound to do. The agent is then the del credere agent of the vendor at law. The vendor hereby gives notice to the buyer of the assignments referred to in clause 23.3.
- 23.3. When this clause applies, in addition to any rights of the agent that arise by operation of the law, the parties agree that, subject to clause 23.5 the agent is subrogated to all rights of the endor under these terms and conditions against the buyer.
- 23.4. The vendor acknowledges that the agent may take enforcement, repossession or other action to recover any livestock for which the huver has not paid in full or the Price of such livestock.
 - (a) when this clause does not apply, as agent of the vendor (including by reselling the livestock); and
 - (b) when this clause applies, on the agent's own behalf exercising the rights of the vendor by subrogation or assignment under these terms and conditions (whether in the vendor's name or not) and, where title to the livestock has not passed to the agent, by selling the estock as agent of the vendor without the agent having to account to the vendor for the proceeds of sale
- 235. The agent may at any time, assign, transfer, securitise or otherwise dispose of all or any of its rights under these terms and conditions and any debts created pursuant to it (including, without limitation, the rights assigned to it under clause 23.3).
- 23.6. The vendor hereby irrevocably appoints the agent as the vendor's attorney to:
- (a) do at any time and in any manner as the agent thinks fit all acts necessary or desirable to perfect or improve the rights and interests afforded, or intended to be afforded, to the agent under these terms and conditions; and
- (b) appoint one or more sub-attorneys to do anything that the agent may do as the vendor's
- 237. These terms and conditions do not render the agent liable to the buyer as vendor nor entitle the buyer to set off against the agent any right the buyer may have against the vendor or
- otherwise.

 23.8. The buyer acknowledges that the provisions of this clause 23 are intended solely for the benefit of the agent (and its assigns) and the vendor. The liabilities and obligations of the buyer will not be in any way affected:

 (a) by this clause 23, other than as it expressly provides; or
 - (b) by the failure of the agent or the vendor or either of them to comply with the terms of this
- 23.9. The buyer must pay all amounts payable to the vendor or the agent under these terms and conditions without any deduction, withholding, set off or counterclaim whatsoever, whether the benefit of a deduction, withholding, set off or counterclaim is alleged to exist in favour of the buyer as against the vendor or the agent in any capacity whatsoever or any other person
- including any assignor of the vendor's or the buver's interests under these terms and conditions (a) The agent agrees that he is liable to pay to the vendor the Price, less such commission
 as is agreed between the vendor and the agent, and in the absence of any agreement such amount as is reasonable, and less the Fees that are payable by the vendor that were ncurred by the agent on behalf of the vendor in relation to the sale of the livestock.
- (b) In the event that the buyer pays the Price or part of it direct to the vendor then the agent has no liability to the vendor for the amount of such payment. Further, if the agent pays the vendor any amount which the buyer also pays direct to the vendor in respect of the sam stock, then the vendor must repay the agent that amount and the agent may debit that amount to an account held in the name of the vendor by the agent. (c) Regardless of whether or not a sale has occurred the agent may, but is not under obligation
- so to do, instead of deducting payments owed to it by the vendor, debit the amount of the commission and fees to an account held in the name of the vendor by the agent. 25 (a) The auctioneer has been retained by the vendor as auctioneer for the purpose of selling the livestock comprised in the lots. The terms of engagement between the auctioneer and the vendor do not extend to the provision of advice by the auctioneer to the vendor in relation
- (b) The vendor, the agent and the buyer agree to comply with their several duties under the Australian Animal Welfare Standards and Guidelines for the Land Transport of Livestock and further to consign, manage, receive, transport and handle livestock in accordance with any other or additional requirements of animal welfare legislation specific to the jurisdiction in which livestock are consigned, managed, received, transported and handled in the course of

to the safety or otherwise of the sale ring, the saleyards and the surrounding environments

CHAPTER THREE - VENDOR WARRANTY FOR CORRECT PRESENTATION

- 26. This chapter applies only in the case of livestock and their companion animals sold at auction for slaughter when the buyer is the slaughterer and the livestock are transported direct from the sale vard to the meatworks at which they are slaughtered. This chapter does not apply if the buyer is a trader who subsequently resells the livestock to a slaughterer. A slaughterer is any person who pays the AMPC Processor levy.
- The warranty of a vendor is that livestock and their companion animals offered for sale at
- (b) are of merchantable quality:
- carry an NLIS device in accordance with State law;
- (d) in the case where a representation has been made in the pre-sale catalogue that the livestock have particular characteristics or are fit for a particular purpose or market, and such representations are based on information in any document, the livestock will have those characteristics or will be fit for the particular purpose or market; and
- (e) all information in any document provided by the vendor is true, complete and correct in all In the event of a breach by the vendor of the vendor's warranty and provided such breach is
- notified by the buyer to the agent by 5:00pm on the 7th day after the fall of the hammer then the buyer is not liable to pay the portion of the Price of such of the vendor's livestock to which 29. However if the breach by the vendor is such that the livestock are not rejected outright but are
- instead downgraded then the buyer will pay the value of the livestock at their next highest and 30. In the case of a breach by the vendor of the vendor's warranty then the vendor will also be
- liable to the buyer for any further losses which the buyer might establish but the buyer will take all reasonable steps in co-operation with the agent and vendor to mitigate both the effec of the breach and the amount of any loss. 31. Where a sentinel animal of a lot tests positive for chemical residue, or foreign material contamination and provided such test is certified and notified as required by these vendor
- (a) the buyer will be entitled to delay payment for the price of all livestock in that lot only: or (b) the vendor has the option, at the vendor's cost, of collecting the companion animals, if allowed by law; or of having the livestock slaughtered in which event the risk of further condemnations will be that of the vendor. Where product integrity is potentially
- jeopardised, the Processor has the right to refuse slaughter and send the livestock back to the consigning property at the vendor's cost. 32. The auctioneer is liable to the buyer in respect of any breach of the vendor's warranty arising
- (a) any error, by the auctioneer, of transcription of information from the NVD completed by the vendor to the pre-sale catalogue or the buyers post-sale summary:
- (b) any failure by the auctioneer to notify the buyer, prior to bidding, of any breach by the vendor of the warranty of the vendor if the buyer establishes that the agent knew of such breach prior to the sale; and
- (c) any failure by the auctioneer to announce prior to hidding, or disclose in the pre-sale catalogue, that the vendor has failed to provide a NVD that is complete in all material

CHAPTER FOUR - OWNERS RISK FOR CONDITION OF CATTLE

- This chapter applies only in the case of cattle and their companion animals sold at auction for slaughter when the buyer is the slaughterer and the cattle are transported direct from the sale vard to the meatworks at which they are slaughtered. This chapter does not apply if the buyer is the AMPC Processor levy.
- Owners risk reflects the producer's responsibility to provide slaughter cattle for sale that are fit for human consumption. Cattle are fit for human consumption if they are not condemned as unfit by government. Owners risk applies if the condemnation is due to a condition in the animal which the buyer establishes, by the relevant government certificate, existed prior to the
- A buyer with the benefit of owners risk protection is not liable to pay the Price of that animal to the vendor. The buyer remains nevertheless liable for all costs incurred after the fall of the hammer in transport, slaughter, testing and disposal of the animal.

 Owners risk protection is available to the buyer of cattle to which this chapter applies if all of
- the following are satisfied: (a) a certificate is issued by povernment which states the relevant NLLS REID tag number and PIC, the date of the certificate, the reason for condemnation and that the reason for
- condemnation existed prior to the fall of the hammer; (b) the certificate is received by the selling agent either in its original form or by fax or electronic communication in the form of data, text or imaging by 5:00pm on the 7th day
- after the fall of the hammer; and (c) if the condemnation is due to chemical residue the certificate follows testing in a ment approved laboratory which establishes maximum residue limits in excess of
- the Australian limit. 37. Owners risk does not apply, and the buyer must pay for the cattle, if the reason for demnation is any of bruising, fever, partial condemnation o

CHAPTER FIVE - NOTICES REQUIRED BY LEGISLATION

NSW Property, Stock and Business Agents Act 2002 Warnings

- Penalties for collusive practices. It is an offence against the Property, Stock and Business Agents Act 2002 for a person to do any of the following as a result of a collusive practice, or to induce or attempt to induce another person by a collusive practice to do any of the following:
- to abstain from bidding; or to bid to a limited extent only; or
- (iii) to do any other act that might prevent free and open competition. Severe penalities may be imposed on persons convicted of collusive practices.

 The auctioneer has the right to make one bid on behalf of the vendor if the auctioneer clearly and
- precisely announces that fact prior to the sale. **Tasmania Legislation.** An auctioneer conducting a public auction must not appear to acknowledge the making of a bid if no bid was made. A person must not participate in collusive practices by way of making or receiving an unlawful promise to abstain from bidding, not to bid

except to a limited extent or do any other thing which may prevent free and open comp WA Auction Sales Act 1973 s31 NOTICE.

- (i) induce or attempt to induce another person to abstain from bidding by means of a promise expressed or implied, that the other person will have the right to elect to take over as buyer or to toss or draw lots to establish who is to become the owner;
- (ii) abstain or agree to abstain from bidding as a result of such a promise er or permit or cause to be entered in the auctioneer's record any name other (iv) enter in the auctioneer's record the name of the buyer other than that of the actual successful
- (v) in the case of successful bidder supply wrong information as to the name of the buyer to the auctioneer or to any person, firm or corporation on whose behalf the sale is conducted. The vendor, or any person on behalf of the vendor, or the auctioneer have the right to make no more

These Livestock Auction Terms & Conditions of Sale are provided to ALPA members as re terms and conditions only

Thank you for taking an interest in the 6th Annual Cree Bull Sale catalogue.

If you have purchased a Cree bull from the sale, we wish you all the best and we will be in contact to organize delivery.

Also, to the under bidders and to those who attended the sale, we sincerely appreciate your attendance.

We wish you the very best in your business and hope the weather is kind.

A special thank you to Simone from Rolling Designs and Outback Connections for donating to Capricorn Rescue Helicopters.

Kind Regards,

Shaun & Jo McGuigan
