Bulls Weighed **11/9/2023**. Daily Liveweight Gains (DLG) calculated after subtracting 32kg birthweight.

Bulls scanned by David Reid **11/9/2023**.

Bulls evaluated for breeding soundness with Semen Morphology assessed by Dr Kim Kelly.

Scrotal circumferences (SS) measured **30/8/2023**.

Females pregnancy tested by Dr Samantha Irwin of Bell Bunya Vet Practice.

**Vaccinations:**

Bulls given 3-germ blood as weaners

Bulls given 7-in-1 and Vibrio boosters **21/7/23**

Bulls given 3-day sickness boosters **30/8/2023**

Females given 7-in1 booster July, 2023 and 3-germ blood **9/8/2023**

The bulls who have highlighted lot numbers started on oats later than the other bulls and fell behind by 75kg as a result. In a normal year they would have compensated for this but have not. Their weights, daily gains and all scan measurements would be higher if they had the same pastures as the other sale bulls. You can rely on their EBVs to get an indication of their breeding potential.

These bulls provide an opportunity to purchase quality, high performance animals at reduced prices.

**\*Catalogue Correction** - the ages for Lots 89-93 in the catalogue are incorrect. Add 12 months to each of them. \* They

**\*\*Retained Semen Shares**

Rosevale will retain a 1/8 Semen Share in Lots 1, 5 and 8. Semen has been collected from these bulls. The vendor retains the right to collect further semen in the future at the buyer's convenience, at the vendor's expense.
